- **Architect:** In-house architects team
- **Project scope:** Approx. 110 m2 with smooth finish and 106 m2 with textured finish

COS is a London-based fashion brand known for collections that balance innovative design with enduring style, with every piece made to last beyond the season.

Once a neoclassical bank, COS opened its flagship store located in the historic centre of Antwerp.

Part of the former neoclassical bank update was the use of our Breathaplasta Universal Plaster, where they used different techniques to create a natural and smooth finish. Approximately 216 m2 were used to create a more sustainable, cleaner air place.
