

SWINTON ESTATE

Adaptavate is a world leader in developing and industrialising carbon negative construction materials.

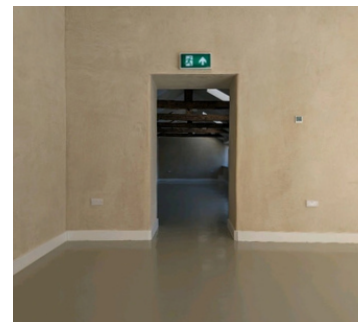

AT A GLANCE

1850s commercial property

- **Location:** North Yorkshire
- **Project type:** Commercial retrofit
- **Property type:** Detached commercial property
- **Product:** Breathaplasta Universal and Thermal
- **Architect:** Liam Newton
- **Installer:** Swinton Estates Project Team

The 1850 detached commercial property found its reuse as it was converted to a commercial space for Cashmere Clothing.

Breathaplasta Universal was applied on Wood fibre board for this solid wall property. Its' challenge was the included Wall insulation whilst maintaining a natural feel to the environment.

“We chose to use natural construction materials for building and occupant health benefits, including the reduction of mould, as well as for the natural feel and look ascetic.”

Liam Newton
